VOLUME 7: 1992

TITLE

Adaptive access path selection for relational database systems Y-H Lee and P S Yu **52**

Algorithms for processing NP-complete and isomorphic complete problems A Kapralski **218**

An algorithm for resource deadlock detection in distributed systems R D Javagal, A K Datta and S Ghosh **257**

Augmenting multikey searching structure for general database queries X-H Sun and N N Kamel **229**

Classifying evolving objects on object-oriented knowledge bases J-C Burneau and O Thiery **86**

Comparative study of performance of concurrency control algorithms in a centralized database D F Ross and R H Davis **3**

Comparing database processor configurations in the database machine ASLM L L Miller, A R Hurson, J K Huang and S H Pakzad **17**

Comparison connection assignments for diagnosis of multiprocessor systems under a two-fault assumption J Wu and E B Fernandez **199**

Computer Aided Performance Engineering: a survey R A Ammar and M J Krzych **170**

Dynamic and static load sharing in hybrid distributed-centralized database systems B Ciciani, D M Dias and P S Yu **25**

Easily testable and reconfigurable two-dimensional systolic arrays J H Kim and S M Reddy **160**

FBASE: A federated objectbase system J G Mullen **91**

GTOOLS: An active GUI toolset for an object-oriented KBMS H Lam, S Y W Su, V Ruhela, S Pant, S M Ju, M Sharma and N Prasad **69**

Incorporating semantics, relationships and exceptions into object oriented data models P L Tan and T S Dillon **122**

MCFS: a multiple criteria reasoning fuzzy expert systems building tool A Kamel, A Nazif, O El-Dessouki and N Kamel **202**

Parallel parsing on a transputer network W B Ligon III and A P Mathur **152**

Parallel *r*-dimensional placement on a vector minisupercomputer C P Ravikumar **147**

ParCE: an object-oriented approach to context-free parsing S R Alpert and M B Rosson **136**

Performance analysis of load-sharing for multiprocessor systems J Liu, C-M Chiang and H D Hughes **210**

Performance modelling of message-based multiprocessors under heavy traffic C Katsinis **190**

Performance of read-only transactions in a distributed system T K Apostolopoulos **236**

Pipelined ring algorithm for matrix multiplication on transputer networks: performance analysis and estimation S Srinivas, A Basu, K G Kumar, A Paulraj and L M Patnaik **42**

Real Fourier transforms on a massively parallel machine A Dubey, M Zubair and C E Grosch **243**

Single row routing with indifference graphs on the Distributed Array Processor D Chennapragada, P Looges and S Olariu **249**

Using an object-oriented database system to construct a spatial database kernel for GIS applications A Choi and W S Luk **100**

BOOK REVIEWS

Essential Concepts of Computer Architecture for Programmers and Computer Users **62**

Theories of Comparative Analysis **62**

BOOKS RECEIVED

System Enquiry - a system dynamics approach **63**

Natural and Artificial Parallel Computation **63**

Uses of Randomness in Algorithms and Protocols **63**
